https://technet.microsoft.com/en-us/library/bb123902(v=exchg.160).aspx QUESTION 124Drag and Drop QuestionYou plan to deploy an Office 365 tenant.The tenant has the following requirements: - The engineering department must centralize time reporting and task management.- The customer service department must be able to collaborate by using a social network platform.- The finance department must be able to collaborate and track versions of financial documents.- All users must be able to synchronize files across multiple computers. You need to plan the solution.Which services should you deploy? To answer, drag the appropriate service to the correct department. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: Explanation:* Egineering: With Project Online time and task management you utilize a centralized and common approach to time reporting and task management.* Customer: Service: YammerYammer is a private microblogging and collaboration platform for enterprise social networking.Unlike public social media platforms such as Twitter,Yammer only allows members to connect with other members who belong to the same email domain. This unique feature provides corporate employees with the ability to communicate privately, using a graphical user interface (GUI) that resembles Facebook.Finance: SharePoint OnlineDocument collaboration is a critical element to working effectively as a team in your enterprise. The combination of SharePoint and Office offers a spectrum of document collaboration methods, whether it is co-authoring a spreadsheet or routing a business plan through a workflow.* All users: Save your work files to OneDrive for Business so they're always with you. One place for everything in your work life.Store: Securely store all your files and share them with coworkers. Each user gets 1 TB of storage.Sync: Sync files across devices and access them anywhere, even when you're offline.
