

[2017 New Lead2pass Latest 70-345 PDF Guarantee 100% Pass 70-345 (1-15)]

2017 May Microsoft Official New Released 70-345 Q&As in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! I'm currently studying for Microsoft exam 70-345 I do enjoy studying for exams. It's hard, but it's an excellent forcing function. I learn bits and pieces here and there now and then about this and that, but when I have an exam schedule for a set date, I have to study! And not only do I put in more hours, but I follow a more systematic approach. In this article, I'm going to share Lead2pass braindumps in case you too are studying and this method works for you. Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-345.html> Case Study 1 - Fabrikam inc (Question 1 - Question 7) Overview Fabrikam. Inc. is an international manufacturing company that has 5,000 employees. The company has sales, marketing research and human resources departments. Fabrikam has two main offices and three branch offices. The main offices are located in New York and London. The branch offices are located in Seattle, Montreal, and Paris. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. The WAN connections from the main offices to the branch offices are reliable. Existing Environment Exchange Environment The Exchange Server organization contains servers that have either Exchange Server 2010 or Exchange Server 2013 installed. Each main office contains two Exchange Server 2013 servers. Each branch office contains one Exchange Server 2010 server. MX records are configured to deliver email to the offices in New York and London. Email is delivered to the London office only if the New York office is unavailable. Each office is configured to use a separate namespace for client access. The New York office is configured to use a namespace of mail.fabrikam.com. The servers in the New York and London offices are members of a database availability group (DAG). Each mailbox database in the New York and London offices has three copies. The technical support staff in the branch offices have administrative access to the existing Exchange servers and are assigned Organization Management permissions. Users from the sales department frequently send email messages that contain the Social Security number of customers in the United States. Problem Statements Fabrikam identifies the following issues on the network: - Users in the Paris office report that when launching Microsoft Outlook, they receive a security alert indicating a certificate name mismatch. The security alert is not generated when they connect to Outlook Web Access. Users from the other offices do not report receiving the security alert. - Network administrators report that the mailbox databases in the New York office sometimes activate on the Exchange servers in the London office, resulting in poor performance for the New York office users. Requirements Planned Changes Fabrikam plans to implement the following changes to the network: - Upgrade the organization to Exchange Server 2016 during the next six months. - Enable online document viewing and editing from Outlook on the web. High Availability Requirements Fabrikam identifies the following high-availability requirements for the planned deployment: - Mailbox databases that contain mailboxes for the New York office users must only be activated on the servers in the London office manually. - All client access connections to the London and New York offices must use load-balanced namespaces. The load balancing mechanism must perform health checks. Security and compliance requirements Fabrikam identifies the following security and compliance requirements: - After the planned upgrade, the maximum mailbox size must be 5 GB. ?Administrators from the branch offices must be able to view the mailbox properties and reset the passwords of the users, but must be prevented from changing the mailbox database configurations. - Users who are involved in legal disputes with customers must be prevented from permanently deleting email messages pertaining to the dispute. The users must be able to delete all other messages permanently. - If a user enters a Social Security number in an email message addressed to an external recipient, the user must receive a notification before sending the message If the user sends the message. The message must not be delivered. A compliance officer must be notified of the violation. Connectivity requirements Fabrikam identifies the following connectivity requirements: - Connections for inbound and outbound email must be initiated and terminated from an Edge Transport server in the perimeter network. - All external client connections from the branch office users must be proxied from the New York office to the branch offices. - The number of namespaces used for client access must be minimized. QUESTION 1 You deploy Layer 7 load balancers to the New York and London offices. You are planning the namespace configuration that will be used once you complete the planned upgrade to Exchange Server 2016. You need to recommend a solution to meet the connectivity requirements for the namespaces. What should you recommend? A. On the New York office servers, change the internal URLs to mail.fabrikam.com. B. On all of the branch office servers, change the external URLs to Snull. C. On all of the branch office servers, change the external URLs to mail.fabnkam.com. D. On the New York office servers, change the internal URLs to Snull. Answer: C QUESTION 2 You need to recommend changes to the messaging infrastructure. The changes must meet the connectivity requirements after the planned upgrade. Which two actions should you recommend? Each correct answer presents part of the solution. A. From the Mailbox servers, import the Edge Subscription file. B. On the Edge Transport Servers, start Edge Synchronization. C. On the Edge Transport servers, import the Edge Subscription file. D. On the Edge Transport servers, create an Edge Subscription file. E. On

the Mailbox servers, restart the Microsoft Exchange Transport service. Answer: AE QUESTION 3 You need to recommend changes to the existing environment to meet the high-availability requirements for the mailbox databases. What should you recommend? A. Run TheSet-MailBoxDatabasecmdlet. B. Run theSet-DatabaseAvailabilityGroupcmdlet C. Run theSet-MailBoxServercmdlet. D. Run theSet-MailBoxDatabaseCopycmdlet. Answer: B Explanation:

[https://technet.microsoft.com/en-us/library/dd297934\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/dd297934(v=exchg.160).aspx) QUESTION 4 You begin to implement the Exchange Server 2016 servers and plan to decommission the Exchange Server 2013 servers during the next six months. You need to recommend which actions must be performed to support the planned changes for document collaboration. You install Microsoft Office Online Server on a new server. Which two cmdlets should you recommend running next? Each correct answer presents part of the solution. A. New-OfficeWebAppsFarm B. Set-PartnerApplication C. Set-MailboxServer D. New-OfficeWebAppsHost E. Set-OrganizationConfig Answer: AC QUESTION 5 You need to recommend a solution for the users involved in the legal disputes. What should you include in the recommendation? A. a journal rule B. an Outlook protection rule C. an in-place Hold D. a Litigation Hold Answer: C Explanation:[https://technet.microsoft.com/en-us/library/ff637980\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/ff637980(v=exchg.160).aspx) QUESTION

6 Hotspot Question You need to configure a data loss prevention (DLP) policy to meet the compliance and security requirements. How should you configure the policy rule? To answer, select the appropriate options in the answer area. Answer: QUESTION 7 You need to recommend changes to the existing environment to meet the high-availability requirements for the mailbox databases. What should you recommend? A. Run the Suspend-MailboxDatabaseCopy cmdlet B. Run the Update-MailboxDatabaseCopy cmdlet. C. Deploy a file share witness to a branch office. D. Modify the cluster resource properties. Answer: A Explanation:

[https://technet.microsoft.com/en-us/library/dd351074\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/dd351074(v=exchg.160).aspx) Case Study 2 - Relecloud (Question 8 - Question 12) Existing Environment Directory Environment The network contains a single Active Directory forest named relecloud.com. The forest contains a single domain and a single Active Directory site. All servers run Windows Server 2012 R2 and are members of the domain. All client computers run Windows 10 and are members of the domain. The Active Directory forest is prepared for Exchange Server 2016. Exchange Environment Relecloud has an Exchange Server 2013 Service Pack 1 (SP1) organization. The organization contains six servers. The servers are configured as shown in the following table. The organization has the following configurations: - EX1, EX2, and EX3 are members of a database availability group (DAG) named DAG1. - Edge Synchronization is configured for the Active Directory site. - All client computers have Microsoft Outlook 2013 SP1 installed. - All inbound and outbound mail flow is routed through EdgeEx. - Antispam transport agents are configured on EdgeEX. - Active Directory split permissions are enabled. - Outlook anywhere is enabled. Developers are Relecloud develop applications that send email notifications. These notifications are sent by using an SMTP client. Requirements Planned Changes Relecloud plans to upgrade all of the Mailbox and Client Access servers to Exchange Server 2016. The servers will host all of the mailboxes in the organization. The SMTP clients used by the development department users will use the new email servers to relay email messages Connectivity Requirements Relecloud identifies the following connectivity requirements: - The default connection method for the Outlook clients must be MAPI over HTTP. - All Exchange ActiveSync users must be prevented from sending email messages that are larger than 1 MB. Compliance Requirements Relecloud identifies the following connectivity requirements: - Prevent all users in the organization from deleting email messages that contain the word RelecloudFutures. - Log all of the details that relate to the creation of new mailboxes. Availability Requirements Relecloud identifies the following availability requirements: - Implement a new Exchange Server 2016 DAG. - Maintain multiple copies of the mailbox information during the upgrade process to Exchange Server 2016.

QUESTION 8 You are planning the deployment of the Exchange servers. You need to recommend which configurations must be performed after the installation of Exchange Server 2016 to ensure that the users can access the mailboxes without receiving error messages. Which two actions should you recommend? Each correct answer presents part of the solution. A. Add the new server to the Exchange Servers group. B. Create a Send Connector. C. Import the certificate from EX3 and assign the certificate. D. Configure the virtual directory URLs. E. Create a Receive Connector. Answer: CD Explanation:

[https://technet.microsoft.com/EN-US/librarv/mt634322\(v=exchg.160\).aspx](https://technet.microsoft.com/EN-US/librarv/mt634322(v=exchg.160).aspx) QUESTION 9 You need to meet the connectivity requirement for the Exchange ActiveSync clients after the planned upgrade. What should you do? A. Modify the EdgeTransport.exe.config file. B. Run theSet-TransportConfigcmdlet. C. Run theSet-ActiveSyncMailboxPolicycmdlet D. Modify the Web.config file. Answer: D Explanation: [https://technet.microsoft.com/en-us/library/hh529949\(v=exchg.150\).aspx](https://technet.microsoft.com/en-us/library/hh529949(v=exchg.150).aspx) QUESTION 10 Drag and Drop Question You need to prevent all of the users from deleting certain email messages after the planned upgrade. The solution must meet the compliance requirements. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer:

QUESTION 11 After deploying new servers, you configure the development applications to send email notifications by using a new server that runs Exchange Server 2016. You need to reduce the likelihood that the email messages will be identified incorrectly as

spam. What should you do? A. On the new server run, theSet-TransportConfigcmdlet and specify the-/nterna/SMTPServersparameter. B. Create a new internal relay accepted domain. C. Upgrade EdgeEX to Exchange Server 2016. D. On the new server run, run theSet-TransportServercmdlet and specify Xhe-AntiSpamAgentsEnabledar6et Answer: A Explanation: <http://www.techieshelp.com/exchange-2013-enable-anti-spam/> QUESTION 12 You need to ensure that members of a group named Relecloudadmins can create user accounts and mailboxes for new employees after the planned upgrade. What should you do first? A. Run theNew-ManagementRolecmdlet. B. Run theNew-ManagementRoleAssignmentcmdlet. C. Run setup.exe and specify the/PrepareDoma/nparameter. D. Run setup.exe and specify the/prepareADparameter. Answer: B Explanation: [https://technet.microsoft.com/en-us/library/dd335193\(v=exch.160\).aspx](https://technet.microsoft.com/en-us/library/dd335193(v=exch.160).aspx) Case Study 3 - Contoso Ltd (Question 13 - Question 18) Overview General Overview Contoso. Ltd. is an international company that has 3,000 employees. The company has sales, marketing, research, and human resource departments. Physical Locations Contoso has two main offices. The offices are located in New York and Chicago. Each office has a data center. The New York office uses a network subnet of 10.1.0.0/16. The Chicago office uses a network subnet of 10.128.0.0/16. The offices connect to each other by using a WAN link. Each office connects directly to the Internet. Existing Environment Active Directory The network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2012 R2. The forest functional level is Windows Server 2012 R2. The forest contains six domain controllers configured as shown in the following table. The forest is configured as a single Active Directory site. Active Directory administrators manage the Active Directory schema. Exchange Server administrators do not have access to modify the schema. Contoso has deployed Active Directory Rights Management Services (AD RMS). Current Business Model Contoso partners with a company names Fabrikam. Inc. on manufacturing initiatives. The partnership between Contoso and Fabrikam requires that both companies share confidential information frequently. Requirements Business Goals Contoso plans to install Exchange Server 2016 to provide messaging services for its users. It must be as easy as possible for the users at Contoso to share free/busy information with the users at Fabrikam. As much as possible. Contoso plans to minimize the costs associated with purchasing hardware and software. Planned Changes Contoso plans to implement the following changes before installing Exchange Server 2016: - Install hardware Network Load Balancing (NLB) in the New York and Chicago offices. - Implement Microsoft Office Online Servers in the New York and Chicago offices. - Provide Contoso users with company-approved tablets. Planned Messaging Infrastructure You plan to create an Exchange Server 2016 organization named Contoso. You plan to deploy seven servers that will have Exchange Server 2016 installed. The servers will be configured as shown in the following table. All of the servers will be members of a database availability group (DAG) named DAG01. Client Access Requirements Contoso identifies the following client access requirements for the planned deployment: - Users must be able to configure their tablet to synchronize email by using Autodiscover. - Users must be able to access the Exchange Server organization by using the following names: o Mail.contoso.com o Autodiscover.contoso.com - Users must be able to access Outlook on the web internally and externally from their tablet. - Users must be able to access Office Online Server by using the URL of office-online.contoso.com. Security Requirements Contoso identifies the following security requirements for the planned deployment: - Exchange Server mailbox databases must be encrypted while at rest. - Users must be prevented from using Outlook on the web while they are offline. - Contoso users must be able to share Calendar details with approved external domains only. - Email messages sent to the users in the fabrikam.com SMTP domain must be encrypted automatically. - Whenever possible, client computers must be directed to the same Exchange server for log collection. - Users must be able to access their mailbox by using Exchange ActiveSync on the company-approved tablets only. - Email messages sent from the users in the human resources department of Contoso must be protected by using AD RMS. regardless of the mail client. Availability Requirements Contoso identifies the following high-availability requirements for the planned deployment: - Servers must be able to complete a restart without administrative intervention. - The network load balancer must be able to probe the health of each workload. - If a data center fails, the databases in the other data center must be activated automatically. - Redundant copies of all email messages must exist in the transport pipeline before and after delivery. - Email messages must be made highly available by the Exchange Server organization before and after delivery. - If you manually mount the databases following the data center failure, the databases in the failed site must be prevented from mounting automatically. QUESTION 13 You need to recommend a solution that meets the security requirements for the mailbox databases. What should you include in the recommendation? A. Resilient File System (ReFS) B. Transparent Data Encryption (TDE) C. BitLocker Drive Encryption (BitLocker) D. Encrypting Files System (EFS) Answer: C QUESTION 14 You run the Get-SendConnector cmdlet and you receive the following output. You need to recommend which actions are required to secure email connectivity between the contoso.com SMTP domain and the fabrikam.com SMTP domain. Which two actions should you recommend? Each correct answer presents part of the solution. A. Import a server certificate that has a subject name ofex01.contoso.com and a subject alternate name ofex02.contoso.com. B. Create an Outlook protection rule. C. Import a server

certificate that has a subject name of smtp.contoso.com. D. Configure theTLSSendDomainSecureListparameter for the organization. E. Modify theConnectorTypeparameter for the Send connector. Answer: CD Explanation:

[https://technet.microsoft.com/en-gb/library/bb123543\(v=exch.141\).aspx](https://technet.microsoft.com/en-gb/library/bb123543(v=exch.141).aspx) QUESTION 15 You need to recommend a solution that meets the security requirements for mobile devices. Which two objects should you include in the recommendation? Each correct answer presents part of the solution. A. a device access rule B. a mobile device mailbox policy C. a data loss prevention (DLP) policy D. an Outlook Web App policy Answer: AD Explanation: <https://technet.microsoft.com/en-us/library/dn792010.aspx> [https://technet.microsoft.com/en-us/library/dd297989\(v=exch.160\).aspx](https://technet.microsoft.com/en-us/library/dd297989(v=exch.160).aspx) If you want to prepare for 70-345 exam in shortest time, with minimum effort but for most effective result, you can use Lead2pass 70-345 dump which simulates the actual testing environment and allows you to focus on various sections of 70-345 exam. Best of luck! 70-345 new questions on Google Drive: <https://drive.google.com/open?id=0B3Syig5i8gpDeXNER2I1REtHTIU> 2017 Microsoft 70-345 exam dumps (All 104 Q&As) from Lead2pass: <http://www.lead2pass.com/70-345.html> [100% Exam Pass Guaranteed]
